WHAT I DO

I am a Frontend developer focused on building amazing, responsive and user-based interfaces. I develop with the aim to satisfy the customer and users' needs. I also transform exquisite designs, be it mine or any other, into code using HTML, CSS, and Javascript and related libraries e.g react, bootstrap, and others. I am working on building user-based applications that incorporate smart contracts in their functionalities.

TOOLS

Programming Languages: Python, Javascript, typescript, solidity.

Version Control: Git, Github

Structure and Design: HTML 6, CSS4, SASS.

Frameworks: React, Bootstrap CSS.

Extras: MS-Word, MS-Excel, Powerpoint

PROJECTS

Site Redesign

- I was on a team of Designers and Frontend Developers that handled the rebranding of [Procurtech Ltd](#). We handled the redesign and development of the site from scratch using only HTML, CSS, and Javascript to enhance responsiveness

NIPTREX Web and Mobile App

- I was on a team of developers that built the above company's website and Application that's responsive on all devices using typescript.
- Managed the states using redux and implemented bootstrap in designing the components
- Also consumed the needed APIs using Axios HTTP client that handles requests and returns a response be it a success message or error message all stated in the API documentation that is automatically stored by the implementation of caching techniques for easy retrieval of data when needed.
- Worked hand in hand with the with the back end developers for the perfect running of the Application.

GPT3 Clone

- I built from scratch the famous GPT3 frontend webview using react.js.

Site Development

- I built a personal education platform and built out the frontend using HTML, CSS, and Javascript, to help with assisting developers to understand more programming concepts.

Personal Email Sender

- I built an email sender that can send emails to any specified email with its content and body attached to it. It was built with J
- HTML, and was designed with CSS and Javascript.

Wave Portal

- Building a blockchain enabled website that allows entry for greetings and suggestions from people and is capable of storing details on the chain for a faster and more transparent way of sharing thoughts

WORKING EXPERIENCE

Lesson Tutor

- At IGANMODE GRAMMAR SCHOOL (**IGS**), I coordinated the day to day tutoring of over 100 students, development of training materials and end of week assignments, prepared students for inter-schools competitions from which some of them emerged winners
- I also provided a student with an overall score of 96/100 at the national Cowbell Mathematics competition.
- I was Awarded IGS's first outstanding mathematics student for not only being an exceptionally intelligent student, but also helping many other students become better hence producing mass pass in WAEC's Mathematics.

School Class Teacher

- At VATAC NURSERY AND PRIMARY SCHOOLS, single handedly managed the day to day affairs of the pupils. I was also responsible for imparting knowledge and assessing the performances of these pupils. I also took pupils and students ranging from primary 1 to sss3 private lessons and **quiz**.
- At PARADISE COLLEGE and SILVERSON COLLEGE, helped Majorly in the subjects involving calculations most especially Mathematics and Sciences. put in place a system that enables practical comprehension of every thought theory and also builds the competitive spirit of the students by organizing price-attached Competition

SKILLS

- Good Communication skill that spans various age groups, social status and ethical standards.
- Technical Analyst : identifying new trading opportunities with a view of past trading events.
- Product Awareness specialist /market enthusiast : capable of providing the fundamental knowledge responsible for choosing a product and able to convince potential buyers into buying any product.
- Digital Marketing: capable of tracking customers/reaching desired audiences via the internet through the running of Ads, also capable of creating websites that speak volume of the products/services to those outside the geographical area the company is located.
- An excellent problem solving skill and Leadership spirit and mentality.
- Smart Contracts Creator : skilled at bringing the decentralized part of any contract and registering it on the chain where it can't be altered.
- Content creation/Technical writing: good at breaking down complex analogies into understandable and attractive contents.

AWARDS AND HONORS

National Competitions

- Overall best participating student at the NIIT e-learning scholarship.
- **Second Best** student at Nigerian Mathematics Olympiad.

- **Second Best** student at National Mathematics Center (NMC) Olympiad at **Ogun State** .
- **Fifth Best** student at the National Mathematics Center (NMC) Olympiad at **Kaduna State**.
- **Eight Best** student at the Mathematics is Simple Competition (OGF) **Nigeria**.
- **Best** student at the Covenant University initiative competition **Ogun State**.

International Competitions

- **Third Best** student at the American Mathematics Olympiad.
- **Top 7%(Silver Honour)** at the International Youth Math Challenge(IYMC) held across over **65 countries of the World**
- **Certificate of Completion of Smart Contracts at the State University of New York (SUNY) offered through Coursera.**
